47th Annual Survey Report on State-Sponsored Student Financial Aid

2015-2016 Academic Year

National Association of State Student Grant and Aid Programs

## **About NASSGAP and this Report**

The National Association of State Student Grant and Aid Programs (NASSGAP) is dedicated to the promotion, strengthening, encouragement, and enhancement of high standards in the administration and operation of student grant and aid programs, in order that these programs be available to students in all states to expand and further their postsecondary educational opportunities.

NASSGAP serves as a forum for the development and exchange of information, ideas, policy positions, procedures, and needs for student financial assistance for the benefit of member agencies and other organizations. NASSGAP also acts as a collective voice of reasoned opinion before state, regional, and national councils with respect to student financial aid programs.

NASSGAP conducts research, publishes reports, holds conferences, and otherwise engages in activities which help existing student aid programs to become more responsive to federal, regional, and state public policy goals and objectives.

Each year, NASSGAP completes a survey regarding state-funded expenditures for postsecondary student financial aid. This report, the 47th annual survey, represents data from academic year 2015-16. Please note row and column data in the tables may not add to row and column table totals throughout the report due to rounding.

Comments, suggestions, or questions concerning this report may be directed to NASSGAP at 202.721.1186 or nassgapsurvey@nassgap.org.

### **Electronic Resources**

NASSGAP's Web site is www.nassgap.org. The site has many elements of interest to student aid policymakers and researchers including links to state aid agency web sites. Electronic copies of this report, and reports from several previous years, are available in PDF format free of charge at the site.

An online query tool that will allow for customized queries of survey data is available at: www.nassgap.org/customquery

A State Data Quick Check tool which shows expenditures by programs for a selected year is available at: www.nassgap.org/survey/state\_data\_check.asp

A Program Finder Tool which lists programs by user selected criteria is available at: www.nassgap.org/survey/program\_finder.asp

A PDF version of the this year's survey instrument is available at: www.nassgap.org/survey/NASSGAP\_Survey\_Instrument\_2015-16.pdf

## **Executive Summary**

This report provides data regarding state-funded expenditures for student financial aid and illustrates the extent of efforts made by the states to assist postsecondary students. Information in this report is based on academic year 2015-16 data from the 47th Annual NASSGAP survey.

#### **Data Highlights**

- In the 2015-16 academic year, the states awarded about \$12.5 billion in total state funded student financial aid, an increase of less than 1 percent in nominal terms and almost level in constant dollar terms from the \$12.4 billion in aid awarded in 2014-15.
- The majority of state aid (86 percent) remains in the form of grants. In 2015-16, more than 4.1 million grant awards were made representing about \$10.7 billion in need and nonneed-based grant aid. This represents an increase of about 2.2 percent from the \$10.5 billion in grants awarded in 2014-15. Of the grant money awarded in 2015-16, 76 percent was need-based and 24 percent was nonneed-based, about the same as last year.
- Funding for undergraduate need-based grant aid increased nationwide from about \$7.8 billion in 2014-15 to about \$8 billion in 2015-16, an increase of about 1.9 percent in nominal terms.
- Eight states (California, New York, Texas, Pennsylvania, New Jersey, Washington, Illinois, and North Carolina) collectively awarded about \$5.5 billion in undergraduate need-based grant aid, accounting for about 70 percent of all aid of this type.
- States provided about \$1.7 billion in nongrant student aid, including loans, loan assumptions, conditional grants, work -study, and tuition waivers, a drop from last year. Loans and tuition waivers accounted for 72 percent of nongrant funds awarded.

Most states reported state-funded undergraduate programs with a need component, however, two states (Georgia and New Hampshire) reported no need based aid programs. Twenty-six states identified undergraduate programs which made awards based only on merit. Exclusively need-based aid constituted 46.1 percent of all aid to undergraduates, exclusively merit-based aid accounted for 17.6 percent, with the rest, 36.3 percent, accounted for by other programs and by programs with both need and merit components. The amount of undergraduate aid awarded in 2015-16 through programs with a merit component increased to about \$4.5 billion. This compares to \$5.3 billion awarded to undergraduates through programs based only on need.

South Carolina, Georgia, Louisiana, and Tennessee provided the greatest amount of grant aid on a per capita basis. South Carolina, Georgia, and Tennessee provided the most undergraduate grant dollars compared to undergraduate full time equivalent enrollment. South Carolina, Pennsylvania, Virginia, Tennessee, and Louisiana had the highest proportion of total expenditures for state-funded grants compared to State fiscal support for higher education.
